Statement of the Board Chair for the year ended 31 December 2025

The mission of International Institute of Tropical Agriculture (IITA) is to be the leading research partner facilitating agricultural solutions to overcome hunger, poverty, and natural resource degradation throughout Tropical Africa. The Board of Trustees is committed to providing governance, financial and programmatic oversight to ensure efficient and effective management of the Institute.

The decentralization of IITA's structure into five regional hubs managed by Hubs Directors (simultaneously leading a science competency) and its timely implementation from 2012 was crucial to the growth and stability of IITA. In Central Africa, IITA's regional hub headquarter is in Kinshasa (DR Congo); the Eastern Africa hub is in Dar Es Salaam (Tanzania); the Southern Africa hub in Lusaka (Zambia); and the West Africa hub in Ibadan (Nigeria). An additional hub in the Sahel was recently established in Bamako, Mali. IITA hubs have become institutional assets in which donors, governments; various research and delivery partners have invested and where clear impact has been delivered. These hubs will be an asset for CGIAR in sub-Saharan Africa.

IITA delivered a strong financial performance in 2025. Total revenue amounted to US\$90.4 million (2024: US\$115.1 million) representing a 27% decrease and expenditure of US\$90.1 million (2024: US\$114.2 million). Window 3 funding was \$33.2million (2024: US\$46.1 million) while Bilateral funding amounted to \$39.2million (2024: US\$41.2 million).

The Institute's liquidity reduced from US\$52.3 million in 2024 to US\$39.4 million in 2025. This is majorly due to the loss of USAID which has reduced cash disbursement from Donors in window 3 projects. Reserve levels improved with operating reserves increasing from \$12.4 million in 2023 to \$13.6 million in 2024 and days reserves increased from 40.4 days to 57.5 days. The increase in reserve days is due to a decrease in average daily cash expenditure from US \$302.6 to \$235.8. The 2025 audited financial statements show an operating result of US\$227k surplus. The Board recognizes the continuing need to increase reserves and expense days coverage and will continue to work with management to develop action plans to improve days coverage to a desirable level.

The year 2025 marked the beginning of transition into Science Programs, with CGIAR research and innovation providing a 10:1 return on investment, supporting the new initiatives provided funders with a clear path to impact on people, climate, and nature. IITA Scientists continued to actively engage in 12 Science Programs, with a leading role for IITA in one Science Program and in different supporting roles for others.

During 2025, there were significant developments towards strengthening CGIAR governance. The CGIAR Internal Rules Framework was approved, providing a structured approach for the development of system-wide rules. Related amendments to the CGIAR System Framework and Charter were also endorsed. In addition, agreement

was reached on the principles for a revised model of the Integrated Partnership Board, based on a proposal from the General Assembly of Centers. This model, which includes participation of Centers on the Board through their Board Chairs alongside independent members, is intended to strengthen oversight, reduce transactional costs, and improve fiduciary alignment across the system.

The Board of Trustees expresses its appreciation to the Management and staff of IITA for the excellent research and delivery activities conducted during 2025, attracting new partners, funding, and the effective financial and administrative management of the Institute's resources. Finally, the Trustees express deep appreciation to IITA's investors and partners for their contributions to the Institute's mission of reducing hunger and poverty in Africa.

It is also important to note that IITA continues to face reduction in funding as a result of the USAID funding withdrawal and termination of existing Bilateral projects.

Roel Merckx
Chair of the IITA Board of Trustees
4th May 2026

BOARD STATEMENT ON IITA RISK MANAGEMENT - 2025

The Center's Board of Trustees has responsibility for overseeing the effectiveness of the risk management system that IITA management has put in place to identify, manage, and monitor significant risks to the achievement of IITA's business objectives, and to ensure alignment with CGIAR principles and guidelines that have been adopted by all CGIAR Centers.

These risks include operational, financial, and reputational risks that are inherent in the nature, modus operandi, and location of IITA's activities and dynamics of the environment in which IITA operates. Together, they represent the potential for loss resulting from external events, human factors or inadequate or failed internal policies, processes, or systems.

To these ends, the Board has adopted a risk management policy and risk mitigation practices, that have been communicated to all staff, that include a risk framework by which IITA management identifies, evaluates and prioritizes risks and opportunities across the organization; assigns risk owners and develops risk mitigation strategies (including internal controls) which balance benefits with costs; monitors the implementation of these strategies and reports semi-annually to the Audit, Finance and Risk Committee of the Board on results. During 2025, the management continued to review and further develop existing risk management strategies and guidelines to ensure the risk management system in IITA is comprehensive, relevant and continues to be in line with best practices.

The Board will monitor and review progress on an on-going basis as the IITA management seeks to deepen the implementation of the risk management framework, focusing attention on higher priority risks. The Board notes that the effectiveness of risk management depends not only on the identification of the risks but the implementation of effective mitigation plans. The Board continues to assure itself that risk management is effective and sustained.

With regards to IITA's 2025 financial statements and the effectiveness of internal control specific to financial reporting, the Board notes management's assertion in its 2025 Management Letter of Representation (provided to the external auditors) and Management's Statement of Responsibility for Financial Reporting included as part of the annual Financial Statements.

Roel Merckx

Report of Management

The accompanying financial statements of IITA are the responsibility of management and have been prepared in accordance with International Financial Reporting Standards (IFRS) as prescribed for all international research centers having partnerships with the Consultative Group on International Agricultural Research (CGIAR).

IITA maintains a system of internal controls designed to provide reasonable assurance that assets are safeguarded, and transactions are properly executed. IITA's Internal Audit system provides ongoing evaluations of the adequacy, effectiveness and adherence to management's established policies and procedures. The Board of Trustees exercises its fiduciary responsibility for these financial statements through its Audit, Finance & Risk Committee (AFRC).

The AFRC comprises Board of Trustees' members who are not officers of the Institute. The Committee meets with the independent auditors, management, and internal auditors periodically to discuss internal controls, auditing, and financial reporting matters. The Committee reviews, with the independent auditors, the scope, and results of the audit effort.

The accompanying report is based on an audit by the independent accounting firm of KPMG Nigeria.

INDEPENDENT AUDITOR'S REPORT

To the Trustees of International Institute of Tropical Agriculture

Report on the Audit of the Consolidated and Separate Financial Statements**Opinion**

We have audited the consolidated and separate financial statements of International Institute of Tropical Agriculture ("the Institute" or "IITA") and its subsidiary (together, "the Group"), which comprise:

- the consolidated and separate statements of financial position as at 31 December 2025;
- the consolidated and separate statements of activities and other comprehensive income;
- the consolidated and separate statements of changes in reserves;
- the consolidated and separate statements of cash flows for the year ended; and
- the notes, comprising material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated and separate financial statements give a true and fair view of the consolidated and separate financial position of the Institute and its subsidiaries as at 31 December 2025, and of its consolidated and separate financial performance and its consolidated and separate cash flows for the year then ended in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's Responsibilities for the Audit of the consolidated and separate Financial Statements* section of our report. We are independent of the Group and Institute in accordance with International Ethics Standards Board for Accountants *International Code of Ethics for Professional Accountants (including International Independence Standards)* (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated and separate financial statements in Nigeria, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other Information

The management are responsible for the other information. The other information comprises the Statement of the Board Chair, Board statement on the IITA risk management, Report of Management and Other disclosures, but does not include the consolidated and separate financial statements and our auditor's report thereon.

Our opinion on the consolidated and separate financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated and separate financial statements, our responsibility is to read the other information and in doing so, consider whether the other information is materially inconsistent with the consolidated and separate financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management for the Consolidated and Separate Financial Statements

The management are responsible for the preparation of consolidated and separate financial statements that give a true and fair view in accordance with IFRS Accounting Standards, and for such internal control as management determine is necessary to enable the preparation of consolidated and separate financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated and separate financial statements, management are responsible for assessing the Group and Institute's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intend to liquidate the Group and Institute or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Consolidated and Separate Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated and separate financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated and separate financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated and separate financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group and Institute's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group and Institute's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated and separate financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and Institute to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated and separate financial statements, including the disclosures, and whether the consolidated and separate financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the group, as a basis for forming an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for the purposes of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit, Finance and Risk Committee (AFRC) and/or Board of Trustees of the Institute regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

*There were no financing activities in the current year.

The accompanying notes form an integral part of these financial statements

Notes to the financial statements

For the year ended 31 December 2025

1 Reporting Entity

The International Institute of Tropical Agriculture (IITA) is a private, autonomous, international in character, not-for-profit, tax free, scientific and educational institute chartered under the laws of Nigeria by Decree number 32 dated July 1967, to engage in research on resource and crop management and the improvement of selected food crops in Sub-Saharan Africa. The registered office is located at IITA Campus, Ibadan, Nigeria.

IITA, a One CGIAR Center headquartered in Ibadan, Nigeria; is one of Africa's seminal partners in applied agricultural research for sustainable food futures. One CGIAR is a dynamic reformulation of CGIAR's partnerships, knowledge, assets and global presence, aiming for greater integration and impact in the face of the interdependent challenges of today's world. One CGIAR research is dedicated to reducing rural poverty, increasing food security, improving human health and nutrition, and ensuring more sustainable management of natural resources.

The separate financial statements as at 31 December 2025 comprises the financial statements of International Institute of Tropical Agriculture ("the Institute"). The consolidated financial statements comprises the financial statements of the Institute and its subsidiary as at 31 December 2025 (together, referred to as "the Group"). IITA Business Incubation Platform Limited (IITA BIP) is a wholly owned subsidiary IITA. IITA BIP takes innovations and accelerates them into commercial enterprises for public benefit. Agribusinesses such as IITA Goseed Limited, NoduMax, and aflasafe™, turn research into results, giving farmers access to better agricultural products such as high quality seeds, efficient bioinoculants, and improved biocontrol methods. BIP has two subsidiaries namely IITA Goseed Limited which is wholly owned and Cropnuts Agriserve Limited in which it has 51% stake.

2 Basis of Accounting

(a) Statement of Compliance

The separate and consolidated financial statements have been prepared in accordance with IFRS Accounting Standards as issued by the International Accounting Standards Board (IFRS Accounting Standards). The financial Statements which were prepared on a going concern basis, were authorised for issue on May 2026. These financial statements cover the financial year from 1 January 2025 to 31 December 2025 with comparatives being December 2024.

(b) Functional and Presentation Currency

These financial statements are presented in United States Dollars (US \$) (\$), which is the Group and Institute's functional currency. All financial information presented in US \$ has been rounded to the nearest thousand except where otherwise indicated.

(c) Measurement of fair values

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

A number of the Group and Institute's accounting policies and disclosures require the measurement of fair values, for both financial and non-financial assets and liabilities.

The Institute has a framework with respect to the measurement of fair values. Management is responsible for overseeing the process of determination of fair values for assets and liabilities. When applicable, further information about the assumptions made in determining fair value is disclosed in the notes specific to that asset or liability.

Notes to the financial statements

For the year ended 31 December 2025

(c) Measurement of fair values (cont'd)

The Institute has not measured financial instruments and non-financial assets at fair value at the reporting date.

Fair value related disclosures for financial assets are summarised in the following notes:

Material Accounting policies - Note 3

Fair value measurement - Note 20

Quantitative disclosures of fair value measurement hierarchy for assets - Note 20

For the purpose of fair value disclosures, the Group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy, as explained above.

When measuring the fair value of an asset or a liability, the Group and Institute uses observable data as far as possible. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

If the input used to measure the fair value of an asset or a liability might be categorised in different levels of the fair value hierarchy, then the fair value measurement is categorised in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement. The Group and Institute recognises transfers between levels of the fair value hierarchy at the end of the reporting period during which the change has occurred.

Further information about the assumptions made in measuring fair values is included in Financial Instruments - Financial risk management policies and objectives (Note 22).

(d) Basis of Measurement

The financial statements have been prepared under the historical cost basis except for the following items, which are measured on an alternative basis on each reporting date.

Item	Measurement
Non-derivative financial instruments	Initially measured at fair values and subsequently measured at amortised cost
Defined benefits Obligation	Measured at present value of the obligation
Inventories	Lower of cost and net realisable value

(e) Current versus non-current classification

The Group and Institute presents assets and liabilities in the statement of financial position based on current/non-current classification. An asset is current when it is:

- Expected to be realised or intended to be sold or consumed in the normal operating cycle
- Held primarily for the purpose of trading
- Expected to be realised within twelve months after the reporting period, or
- Cash and short term deposits unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period

All other assets are classified as non-current.

A liability is current when:

- It is expected to be settled in the normal operating cycle
- It is held primarily for the purpose of trading
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period

The Group classifies all other liabilities as non - current.

Notes to the financial statements

For the year ended 31 December 2025

(f) New IFRS Accounting Standards, Requirements, and Interpretations

a) Newly effective standards and requirements

Amendments to the following standard(s) became effective in the annual period starting from 1 January 2025. The new reporting requirements as a result of the below amendments and/or clarifications have been evaluated and has no material impact on the consolidated and separate financial statements.

I. Amendments to IAS 21 The Effects of Changes in Foreign Exchange Rates - Lack of Exchangeability

The amendments to IAS 21 deals with situations when one currency cannot be exchanged into another. This lack of exchangeability might arise when a government imposes controls on capital imports and exports, for example, or when it provides an official exchange rate but limits the volume of foreign currency transactions that can be undertaken at that rate. Consequently, market participants are unable to buy and sell currency to meet their needs at the official exchange rate and turn instead to unofficial, parallel markets.

The International Accounting Standards Board (IASB) amended IAS 21 to clarify when a currency is exchangeable into another currency and proposes how companies can best estimate a spot rate when a currency lacks exchangeability.

The effective date of the amendment is for years beginning on or after 1 January 2025.

These amendments will not have material impact on the consolidated and separate financial statements.

b) New and revised IFRS Accounting Standards in issue but not yet effective

At the date of authorisation of these financial statements, the Group has not applied the following new and revised IFRS Accounting Standards that have been issued but are not yet effective:

Amendments to IFRS 10 and IAS 28 Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

Amendments to IFRS 9 and IFRS 7 Classification and Measurement of Financial Instruments

IFRS 18 Presentation and Disclosure in Financial Statements

IFRS 19 Subsidiaries without Public Accountability: Disclosures

IFRS 1, IFRS 7, IFRS 9, IFRS 10 & IAS 7 (amendment) Annual improvement of IFRS Accounting Standards

I IFRS 18 Presentation and Disclosure in Financial Statements

The standard aims to provide greater consistency in presentation of the income and cash flow statements, and more disaggregated information. It provides significant changes to how an Institute presents its income statement and what information needs to be disclosed, and making certain 'non-GAAP' measures part of the audited financial statements for the first time.

The effective date of the amendment is for years beginning on or after 1 January 2027. The directors of the Institute anticipate that these amendments are not expected to have material impact on the consolidated and separate financial statements presentation.

Notes to the financial statements

For the year ended 31 December 2025

II IFRS 19 Subsidiaries without Public Accountability: Disclosures

The Standard provides that subsidiaries using IFRS Accounting Standards but that do not have public accountability, and have parents that produce consolidated accounts, can substantially reduce their disclosures and focus more on users' needs. The standard offers eligible subsidiaries a practical way of addressing the problems of over-disclosure while reducing reporting costs by removing the need to either provide disclosures beyond users' needs or to maintain two separate sets of accounting records.

The effective date of the amendment is for years beginning on or after 1 January 2027.

These amendments are not expected to have any impact on the consolidated and separate financial statements.

III Amendments to IFRS 9 Financial Instruments and IFRS 7 Financial Instruments: Disclosures - Classification and Measurement of Financial Instruments

These amendments clarify how to classify and disclose some financial assets with ESG-linked features. The amendments to IFRS 9 include guidance on the classification of financial assets, including those with contingent features while amendments to IFRS 7 now requires Companies to provide additional disclosures on financial assets and financial liabilities that have certain contingent features. The amendments also introduce an additional SPPI test for financial assets with contingent features that are not related directly to a change in basic lending risks or costs.

The effective date of the amendment is for years beginning on or after 1 January 2026.

These amendments are not expected to have any material impact on the consolidated and separate financial statements.

IV IFRS 10 Consolidated Financial Statements and IAS 28 (amendments) Sale or Contribution of Assets between an Investor and its Associate or Joint Venture

The amendments to IFRS 10 and IAS 28 deal with situations where there is a sale or contribution of assets between an investor and its associate or joint venture. Specifically, the amendments state that gains or losses resulting from the loss of control of a subsidiary that does not contain a business in a transaction with an associate or a joint venture that is accounted for using the equity method, are recognised in the parent's profit or loss only to the extent of the unrelated investors' interests in that associate or joint venture. Similarly, gains and losses resulting from the remeasurement of investments retained in any former subsidiary (that has become an associate or a joint venture that is accounted for using the equity method) to fair value are recognised in the former parent's profit or loss only to the extent of the unrelated investors' interests in the new associate or joint venture.

The effective date of the amendments is yet to be set by the IASB; however, earlier application of the amendments is permitted

Directors of the Institute anticipate that the application of these amendments will have no impact on the consolidated and separate financial statements.

Notes to the financial statements

For the year ended 31 December 2025

V IFRS 1 First-time Adoption of International Financial Reporting Standards, IFRS 7 Financial Instruments:

Disclosures, IFRS 9 Financial Instruments, IFRS 10 Consolidated Financial Statements & IAS 7 Statement of Cash Flows - Annual Improvements - Volume 11

The annual improvements process is a targeted amendments to improve clarity and internal consistency of IFRS Accounting Standards.

The amendment addresses a potential confusion arising from an inconsistency in wording between paragraph B6 of IFRS 1 and requirements for hedge accounting in IFRS 9 Financial Instruments by a first time adopter. The amendment in IFRS 7 among others addresses a potential confusion in paragraph B38 arising from an obsolete reference to a paragraph that was deleted from the standard relating to gain or loss on derecognition. The amendment in IFRS 9 among others addresses a potential lack of clarity in the application of the requirements of paragraph 23 to account for a derecognition of a lessee's lease liability. The amendment of IFRS 10 addresses a potential confusion arising from an inconsistency between paragraphs B73 and B74 of IFRS 10 related to an investor determining whether another party is acting on its behalf. Lastly, the amendment of IAS addresses a potential confusion in applying paragraph 37 that arises from the use of the term 'cost method' that is no longer defined in IFRS Accounting Standards

The effective date of the amendment is for years beginning on or after 1 January 2026.

The directors of the Institute anticipate that these amendments are expected to have no material impact on the consolidated and separate financial statements.

3 Material Accounting Policies

I Basis of preparation

The accounting policies set out in the following pages have been applied consistently to all periods presented in these financial statements, unless otherwise indicated.

II Basis of consolidation

a. Subsidiaries

Subsidiaries are entities controlled by the Institute. The Institute controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. The accounting policies of subsidiaries are modified where necessary to align them with the policies adopted by the Institute.

b. Loss of control

When the Institute loses control over a subsidiary, it derecognises the assets and liabilities of the subsidiary, and any related non controlling interest and other components of equity. Any resulting gain or loss is recognised in profit or loss. Any interest retained in the former subsidiary is measured at fair value when control is lost.

c. Transactions eliminated on consolidation

Intra-group balances and transactions, and any unrealized income and expenses arising from intra-group transactions, are eliminated. Unrealized gains arising from transactions with equity accounted investees are eliminated against the investment to the extent of the Institute's interest in the investee. Unrealized losses are eliminated in the same way as unrealized gains, but only to the extent that there is no evidence of impairment.

Notes to the financial statements

For the year ended 31 December 2025

d. Business combination

The group accounts for business combinations using the acquisition method of accounting. The cost of the business combination is measured as the aggregate of the fair values of assets given, liabilities incurred or assumed and equity instruments issued at the date of exchange. Costs directly attributable to the business combination are expensed as incurred, except the costs to issue debt which are amortised as part of the effective interest and costs to issue equity which are included in equity.

e. Non Controlling interests

Non controlling interests in the net assets of consolidated subsidiaries are identified and recognised separately from the group's interest therein, and are recognised within equity. Losses of subsidiaries attributable to non controlling interests are allocated to the non controlling interest even if this results in a debit balance being recognised for non controlling interest.

Transactions with non controlling interest which result in change in ownership levels, where the group has control of the subsidiary both before and after the transactions are regarded as equity transactions and are recognised directly in the statement of changes in equity.

f. The major assumption made in consolidating the financial statements is that IITA BIP is a wholly owned subsidiary of IITA. IITA BIP's financial statements that have been used in this consolidation include a consolidated financial statements of its two subsidiaries. The 49% non-controlling stake in Cropnuts Agriserve Limited have been adjusted in preparing IITA BIP's consolidated financial statements and represented as the Non-Controlling Interest in the financial position.

The financial statements have been prepared on the historical cost basis. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services at inception.

III. Income Recognition

(a) Government grant and Grant income

Government grants are recognised when there is a reasonable assurance that the grant will be received and all attached conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, which it is intended to compensate, are expensed.

Where the grant relates to an asset, it is recognised as deferred income in the statement of financial position and transferred to statement of activities on a systematic and rational basis over the useful lives of the related assets. When The Group receives non - monetary grants, the asset and the grant are recorded at nominal amount.

Grant revenue comprises of donations received from various sources. The main sources of donations are from CGIAR, Governments of different countries, Private Individuals, Charitable foundations and Companies. The grants, whether restricted or unrestricted, are not recognized until there is reasonable assurance that the Institute has complied with the conditions attached to the grant and that the grant will be received. Restricted grants are recognized as revenue to the extent of expenses incurred.

Grant income is classified into two (2) streams:

Notes to the financial statements

For the year ended 31 December 2025

- Portfolio Grants are those received from a transfer of resources to the Institute in return for past or future compliance to the operating activities of the Institute. Portfolio Grants are divided into Pooled and Non-Pooled funds. The Pooled Funds is referred to as Initiatives while the Non-Pooled funds are sub-divided into Window 3 and Bilateral. All portfolio grants are categorised into three science groups namely Genetic Innovation, Resilient Agrifood Systems and Systems Transformation.
- Non-Portfolio Grants are those received from unconditional transfers of cash or other assets to the Institute. This is basically Country Grant or Government Grant.

Initiatives

Initiative: Under this arrangement, the funding is coordinated centrally by the SMO(System Management Organisation). The entity where the Initiative Lead for each Initiative sits serves as the "Lead entity" whereas the initiative is implemented across all the entities which is herein referred to as "participating entities". This replaces the old Window 1&2.

Science Program

The Initiative metamorphosed into Science Program. Under this arrangement, the funding is coordinated centrally by the SMO(System Management Organisation).

Window 3:

In window 3, the donor directly identifies the research center with a program it wishes to fund and remits the funds for the research through CGIAR funding window to the research center.

Bilateral funds

These are funds sent by the Donor to the identified research center without the involvement of CGIAR. Bilateral incorporates the old challenge programs and N-CRP.

Grants-in-kind

These are recorded at the fair value of the assets (or services) received or promised.

(b) Revenue from contract with customers

The Group is involved in the sale of agricultural produce and provision of related services. Revenue is recognised over time as the services are provided and at a point in time for agricultural produce sold. The stage of completion for determining the amount of revenue to recognise is assessed based on surveys of work performed. If the services under a single arrangement are rendered in different reporting periods, then the consideration is allocated based on their relative stand-alone selling prices. The stand-alone selling price is determined based on the list prices at which the Group sells the product or services in separate transactions.

Revenue represents the value of goods sold and services rendered to third parties net of discount allowed in the ordinary course of business. Revenue is measured based on consideration specified in a contract with a customer. The Group recognises revenue when it sells a product or renders a service to a customer. The primary geographical market through which revenue is earned is Nigeria.

Nature and timing of satisfaction of performance obligation, including significant payment terms

Invoices for goods are issued immediately control of the goods is passed to the customer while invoices for services are usually issued periodically typically one year or less and are payable within 30 days of the invoice date.

Notes to the financial statements

For the year ended 31 December 2025

IV. Foreign currency Transactions

IITA's financial statements are presented in US dollars (US\$), which is also the Institute's functional currency.

Transactions denominated in foreign currencies are translated and recorded in USD at the actual exchange rates as of the date of the transaction.

Monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to the functional currency at the rates of exchange prevailing at that date. Non-monetary assets and liabilities denominated in foreign currencies that are measured at fair value are translated to the functional currency at the exchange rate at the date that the fair value was determined.

Foreign currency differences arising on translation are recognised in profit or loss. Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rate at the date of the transaction.

V. Resources Expended

All expenditures are accounted for on an accrual basis and has been classified under headings that aggregate all related costs to that category. Where costs cannot be directly attributed to a particular heading they have been allocated to activities on a basis consistent with the use of the resources.

In the separate financial statements expenses fall under two major categories:

Expenses that are directly attributable to the government grant; this category of expenses is made up of research expense, CGIAR collaboration expenses and Non CGIAR collaboration expenses. This category of expense is charged directly against the grant income.

Expenses that are incurred in the course of normal operations of the business; which is made up of management and general expenses.

VI. Cash and cash equivalents

Cash and short-term deposits in the statement of financial position comprises cash at banks and on hand and short-term deposits with a maturity of three months or less, which are subject to an insignificant risk of changes in value. Cash and cash equivalents are stated at carrying amount which is deemed to be fair value.

Cash and short term deposits also comprise of cash equivalents which are short-term, highly liquid investments that are: i) readily convertible to known amounts of cash; and ii) invested for a period of 3 months or less, hence the risk of changes in value due to changes in interest rates are insignificant.

VII. Property, plant and equipment

Property, plant, and equipment are tangible goods that are held for use related to the main objective of the Institute, including research activities and administrative and technical support activities; and are expected to be used during more than one accounting period.

The cost of an item of property, plant and equipment is recognised as an asset if it is probable that future economic benefits associated with the item will flow to the entity and the cost of the item can be measured reliably.

Property, plant and equipment are stated at cost, net of accumulated depreciation and/or accumulated impairment losses, if any. Such cost includes the cost of purchase, costs directly attributable to bringing the asset to the location and condition necessary for use.

Notes to the financial statements

For the year ended 31 December 2025

Property, plant, and equipment acquired through non-monetary grants are recognized at the nominal amount at the date of the grant. Such grants are presented in the statement of financial position as deferred income and are taken into account as revenue on a systematic and rational basis over the lifespan of the asset. Property, plant, and equipment acquired through monetary grants are recognized at cost at the date of acquisition.

All new facilities provided by host countries to the Center or built for the use of the Center, which will revert to the host country in the event the Center ceases operations, are recognized as assets. The land is recognised at nominal value and the buildings at historical cost.

Subsequent expenditures are added to the cost of the property, plant, and equipment only if the expenditure improves the condition of the asset beyond its originally assessed standard of performance. All other subsequent expenditures are recognised as expenses of the period where incurred. The cost of replacing a part of an item of property, plant and equipment is recognised in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and Institute and its cost can be measured reliably. The carrying amount of the replaced part is derecognised.

Depreciation is calculated over the depreciable amount, which is the cost of an asset, or other amount substituted for cost, less its residual value. Depreciation is calculated on a straight-line basis over the estimated useful lives of the assets as follows:

Land	Nil
Buildings	50 years
Infrastructure	40 years
Power House	25 years
Laboratory and Scientific equipment	6 years
Furniture and equipment	6 years
Motor vehicles	5 years
Computer equipment	3 years

The land on which the headquarter is situated is a government grant which took the form of a transfer of a non-monetary assets, for the use of IITA. IITA has elected to record both the asset and grant at a nominal amount.

For assets acquired with restricted funds, IITA depreciates the assets over the project life.

Depreciation begins when the asset is available for use. Depreciation ceases at the earlier of the date that the asset is classified as held for sale, and the date the asset is derecognized. The depreciation charge for each period is recognized in the statement of activities.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the statement of activities precisely in other operating income when there is a gain and in the management and general expenses when there is a loss.

The residual values, useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

Notes to the financial statements

For the year ended 31 December 2025

IX Intangible assets

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses, if any. Internally generated intangible assets, excluding capitalised development costs, are not capitalised and expenditure is recognised in the statement of activities when it is incurred.

Intangible assets are subsequently measured using the cost model (cost less accumulated amortization and any accumulated impairment losses if any).

The useful lives of intangible assets are assessed to be finite.

The useful lives of an intangible assets are allocated on a straight line basis as shown below:

Computer software - 3 years

Intangible assets with finite lives are amortised over their useful economic lives and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the management and general expenses in the statement of activities.

Research and development costs

Research costs are expensed as incurred. Development expenditures on an individual project are recognised as an intangible asset when the Institute can demonstrate:

- The technical feasibility of completing the intangible asset so that it will be available for use or sale
- Its intention to complete and its ability to use or sell the asset
- How the asset will generate future economic benefits
- The availability of resources to complete the asset
- The ability to measure reliably the expenditure during development

Following initial recognition of the development expenditure as an asset, the cost model is applied requiring the asset to be carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. During the period of development, the asset is tested for impairment annually.

X Inventories

Inventories are measured at the lower of cost and net realisable value. The cost of inventory includes expenditure incurred in acquiring the inventories and other costs incurred in bringing them to their existing location and condition. Cost is calculated using the Weighted average method. Net realisable value is based on estimated selling price, less further costs expected to be incurred to completion and disposal.

The Institute's inventories are supplies consumed in the operations of the Institute. They are valued at the lower of cost and net realisable value. The cost of inventories comprises all costs of purchase and other costs incurred in bringing the inventories to their present location and condition.

Notes to the financial statements

For the year ended 31 December 2025

Inventory write down is recognized as an expense in the statement of activities. The amount of any reversal of previously written down Inventories arising from increase in net realisable value, is recognised as a reduction in the value of inventories recognised as an expense in the period in which the reversal occurs. The harvested produce is transferred to inventory at fair value less costs to sell; it is thereafter accounted for in accordance with IAS 2, 'Inventories'. However, while the produce is still growing or still attached to the biological asset, its value forms part of the value of the biological asset.

XI Impairment of non - financial assets

The carrying amounts of the Group and Institute's non-financial assets, other than inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated.

The recoverable amount of an asset or cash-generating unit is the greater of its value in use and its fair value less costs to sell. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. For the purpose of impairment testing, assets that cannot be tested individually are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or groups of assets (the "cash-generating unit, or CGU").

An impairment loss is recognised if the carrying amount of an asset or its CGU exceeds its estimated recoverable amount. Impairment losses are recognised in profit or loss. Impairment losses recognised in respect of CGUs are to reduce the carrying amounts of the other assets in the unit (group of units) on a pro rata basis.

Impairment losses recognised in prior periods are assessed at each reporting date for any indications that the loss has decreased or no longer exists. An impairment loss is reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognised.

IITA assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Institute estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or Cash Generating Unit's (CGU) fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or Cash Generating Unit (CGU) exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples, quoted share prices for publicly traded subsidiaries or other available fair value indicators.

Notes to the financial statements

For the year ended 31 December 2025

A previously recognized impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years. Such reversal is recognised in the statement of activities. Their subsequent recognition and measurement will depend on their classification.

XII Financial instruments

Recognition and initial measurement

Trade and Donor receivables are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group and Institute becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price. The Group and Institute financial asset comprises of donor receivables, trade receivables, employee receivables, amount due from related parties, cash and cash equivalents.

Classification and measurement

The classification depends on both the contractual characteristics of the financial instruments and the business model adopted for their management, which is determined at the time of initial recognition. Financial assets that are subsequently measured at either amortized cost or debt instruments at fair value through profit or loss or OCI, are subject to provisions for impairment.

The financial assets applicable to the Group and Institute are:

- i) cash and cash equivalents and
- ii) receivables.

Subsequent measurement

Following the initial recognition of financial assets and liabilities, their subsequent measurement and accounting treatment depends on their classification though there are a few exceptions to this. Either financial assets and liabilities that classified as fair value through profit or losses and other comprehensive income are measured at fair value or financial assets and liabilities at amortised cost. Amortised cost will be calculated using the effective interest rate.

Financial assets at amortised cost

Financial assets are classified at amortized cost only if both of the following criteria are met:

- a The objective of the entity's business model is to hold the asset in order to collect the contractual cash flows; and
- b The contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal outstanding:
 - (i) Principal is the fair value of the financial asset at initial recognition.
 - (ii) Interest consist of consideration for the time value of money, for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs, as well as a profit margin.

Notes to the financial statements

For the year ended 31 December 2025

Interest income from these financial assets is included in finance income using the effective interest rate method. Any gain or loss arising on derecognition is recognised directly in profit or loss and presented in other gains/(losses) together with foreign exchange gains and losses. Impairment losses are presented as separate line item in the statement of profit or loss.

Financial asset, at fair value through profit or loss (“FVTPL”)

Financial assets that are classified at fair value through profit or loss are initially measured at fair value and subsequently carried at fair value on the statement of financial position with all changes in fair value gains and losses and foreign exchange gains and losses, recognized in the income statement in the period in which they occur. Transaction costs on these financial assets are expensed in the income statement.

In addition, a debt instrument that could meet amortized cost criteria can be designated and measured at FVTPL. Upon initial recognition if such designation significantly reduces or eliminates a measurement or recognition inconsistency, referred to as an “accounting mismatch”, which would arise from measuring assets or recognizing the gains and losses on them on different bases

Financial liabilities – Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortised cost or FVTPL. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial liabilities are recognised initially at fair value. Financial liabilities include payables employees, CGIAR Centres and other payables. After initial recognition, taking into account the payment policy of the Center, account payables are measured at amortised cost which does not have significant differences with the fair value.

Other financial liabilities (including borrowings and trade and other payables) are measured at fair value at initial recognition and subsequently at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

The Institute derecognises financial liabilities when and only when, the Institute’s obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

Notes to the financial statements

For the year ended 31 December 2025

The impairment requirements of IFRS 9 apply to financial assets that are measured at amortized cost or FVTOCI. The determination of impairment losses and allowance has moved from an incurred credit loss model whereby credit losses are recognized when a defined loss event occurs under IAS 39, to an expected loss model under IFRS 9, where provisions for impairment are taken upon initial recognition of the financial asset based on expectations of potential credit losses at that time. Under IFRS 9 for financial assets originated or purchased on initial recognition, IITA recognizes an impairment loss at an amount equal to 12-month ECL. This shall continue if the credit risk at the reporting date has not increased significantly since initial recognition; therefore, was and shall remain in Stage 1. IFRS 9 requires the recognition of credit losses over the remaining life of the financial assets ("Lifetime expected credit losses") which are considered to have experienced a significant increase in credit risk (e.g. Stage 2) and for financial assets that are credit impaired at the reporting date (e.g. Stage 3). The lifetime expected credit losses represent all possible expected losses events over the expected life of a financial instrument.

Cash and cash equivalents

Cash is a financial asset because it represents the medium of exchange and is therefore the basis on which all transactions are measured and recognised in the financial statements. Cash deposits in banks give The Group the right to receive cash or draw cheques or other instruments against a favourable balance. All cash and bank balances will be recognised at fair value which is the transaction price unless there are indications that it has been impaired. The Group maintains the bulk of its funds in US Dollars which helps in mitigating against exchange risks against local currencies in countries where the Institute operates.

Accounts receivable – Donors:

These are claims held against donors for the future receipt of money, goods, or services. Receivables due from donors can arise from unrestricted grants that are due as a receivable by the Center and amounts due from restricted grants that have been negotiated between a donor and the Center.

Unrestricted accounts receivable are recognized initially at fair value. Restricted grants are recognized and measured at cost. After initial recognition such accounts receivable are subsequently measured at amortised cost.

"Accounts receivable – Donors" are classified as follows:

Unrestricted grants: Receivables from unrestricted grants are recognized in full in the period specified by the donor.

Restricted grants: Receivables from restricted grants are recognized in accordance with the terms of the underlying contract. Restricted grants include projects financed by initiative/science programs, W3, and Bilateral funding.

Accounts receivable – Employees

After initial measurement, accounts receivable from employees are subsequently measured at amortised cost using the effective interest rate (EIR) method, less impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in the statement of activities. The losses arising from impairment are recognised in the statement of activities.

Notes to the financial statements

For the year ended 31 December 2025

Derecognition

Financial assets

The Group and Institute derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Group and Institute neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset. Where the Group and Institute enters into transactions whereby it transfers assets recognised in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets, the transferred assets are not derecognised.

Financial liabilities

The Group and Institute derecognises a financial liability when its contractual obligations are discharged or cancelled, or expire. The Group and Institute also derecognises a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognised at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognised in profit or loss.

Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Group and Institute currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realise the asset and settle the liability simultaneously.

Impairment of financial assets

Disclosures relating to impairment of financial assets are summarised in the following notes:

- Disclosures for significant assumptions - Note 4
- Account receivables - Note 10

The Group and Institute recognises loss allowances for ECLs on financial assets measured at amortised cost. The Group and Institute measures loss allowances at an amount equal to lifetime ECLs for its trade and other receivables. The Expected credit losses for trade and other receivables are estimated using a provision matrix based on the Group and Institute's historical credit loss experience adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both current as well as the forecast direction of conditions at the reporting date.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group and Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group and Company's historical experience and informed credit assessment and including forward-looking information. The Group and Company assumes that the credit risk on a financial asset has increased significantly if it is more than 365 days past due.

Notes to the financial statements

For the year ended 31 December 2025

The Group and Company considers a financial asset to be in default when:

- the borrower is unlikely to pay its credit obligations to the Group and Company in full, without recourse by the Group and Company to actions such as realising security (if any is held); or
- the financial asset is more than 365 days past due.

Lifetime ECLs are the ECLs that result from all possible default events over the expected life of a financial instrument. 12-month ECLs are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months). The maximum period considered when estimating ECLs is the maximum contractual period over which the Group and Company is exposed to credit risk.

Measurement of ECL

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all cash shortfalls (i.e. the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the Group and Company expects to receive). ECLs are discounted at the effective interest rate of the financial asset.

Credit-impaired financial assets

At each reporting date, the Group and Company assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- significant financial difficulty of the borrower or issuer;
- a breach of contract such as a default or being more than 360 days past due;
- the restructuring of a loan or advance by the Group and Company on terms that the Group and Company would not consider otherwise;
- it is probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties.

IITA assesses, at each reporting date, whether there is any objective evidence that a financial asset or a group of financial assets is impaired. An impairment exists if one or more events that has occurred since the initial recognition of the asset (an incurred 'loss event'), has an impact on the estimated future cash flows of the financial asset that can be reliably estimated. Evidence of impairment may include indications that the donor or a group of donors is experiencing significant financial difficulty, the probability that they will enter bankruptcy or other financial reorganisation and where observable data indicates that there is a measurable decrease in the estimated future cash flows.

Write off

The gross carrying amount of a financial asset is written off when the Group and Company has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. For individual customers, the Group and Company has a policy of writing off the gross carrying amount when the financial asset is 365 days past due based on historical experience of recoveries of similar assets. The Group and Company expects no significant recovery from the amount written off. However, financial assets that are written off could still be subject to enforcement activities in order to comply with the Group and Company's procedures for recovery of amounts due.

Notes to the financial statements

For the year ended 31 December 2025

Presentation of allowance for ECL in the statement of financial position

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

XII. Employee benefits

Short - term benefits

Short-term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided.

Post - employment benefit

Defined contribution plan

Pension

IITA operates a defined contribution pension plan. Fixed contributions are paid to a separate entity. Once contributions are paid, IITA has no further obligation to the employee. Obligations for contributions to defined contribution plans are recognized as personnel cost in statement of activities in the periods during which services are rendered by employees. Staff contributions to the scheme are funded through payroll deductions.

Defined benefit plan

Repatriation benefit

The Group provides repatriation benefits to its internationally recruited staff. These benefits are payable on the return of the employee to his country of origin. The cost of providing benefits under the post retirement benefit plan is determined separately using the projected unit credit method. The benefit is discounted using the effective interest rate (EIR) the at the date of reporting. The benefit is amortised and recorded as a liability, the unwinding of the discount is recorded as an interest cost and the current service cost are recorded as personnel cost in the statement of activities.

Re - measurements, comprising of actuarial gains and losses, are recognized immediately in the statement of financial position with a corresponding debit or credit to undesignated fund through other comprehensive income in the period in which the gains or losses occur. Re - measurements are not reclassified to the statement profit or loss in subsequent periods.

Interest cost is calculated by applying the discount rate to the defined benefit liability. The Institute recognises the following changes in personnel cost under 'management and general expenses in the statement of activities:

- Current service cost
- Interest cost

Termination Benefits

The Group pays Termination benefits to its employees on the expiration of their respective contracts. The benefit is measured as the excess of 10% of gross emoluments over The Group contribution to the employee's pension fund.

XIII. Prepayment

Prepayments are payments made in advance for services to be enjoyed in future. The amount is initially capitalised in the reporting period in which the payment is made and subsequently amortised over the period in which the service is to be enjoyed.

Notes to the financial statements

For the year ended 31 December 2025

XIV. Finance income

Finance income is recognised in the statement of activities when it is probable that economic benefits will flow to the Institute and that amount can be reliably measured.

XV. Deferred income – Donors

These include grants received from donors for which conditions are not yet met and funds received in advance for restricted grants. This however, does not apply to IITA.

“Deferred income – Donors” are classified as follows:

Unrestricted grants: are those received from the unconditional transfer of cash or other assets to the Center. This however, does not apply to IITA

Restricted grants: are those received from a transfer of resources to the Center in return for future compliance relating to the operating activities of the Center. Restricted Grants include W1/W2, W3, and Bilateral projects.

XVI. Indirect Cost Recovery

The indirect cost recovery represents the overhead cost recovered from the restricted projects based on rates agreed and as stated in each project agreement with donors.

XVII. Income tax expense

Income tax expense comprises current and deferred tax. Current tax and deferred tax are recognised in profit or loss except to the extent that it relates to a business combination, or items recognised directly in equity or in other comprehensive income.

The Group and Company has determined that interest and penalties related to income taxes, including uncertain tax treatments, do not meet the definition of income taxes, and therefore accounted for them under IAS 37 Provisions, Contingent liabilities, and Contingent assets.

(i) Current tax

Current tax is the expected tax payable or receivable on the subsidiary's taxable income or loss for the year, using tax rates statutorily enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

The Group offsets the tax assets arising from withholding tax credits and current tax liabilities if, and only if, the entity has a legally enforceable right to set off the recognised amounts, and it intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously. The tax asset is reviewed at each reporting date and written down to the extent that it is no longer probable that future economic benefit would be realised.

(ii) Development levy

Development levy is based on the assessable profits of the subsidiary. This levy was introduced in the new Nigerian Tax Act (NTA), 2025 to consolidate other taxes and levies applicable under the previous finance act (such as Tertiary Education Tax, Nigeria Police Trust Fund, etc.). The provision levies a flat rate of 4% on subsidiary's assessable profit. The levy is recognised in profit or loss in the period to which it relates and accounted for as part of income tax expense.

Notes to the financial statements

For the year ended 31 December 2025

(iii) Deferred tax

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unutilised tax losses, unutilised tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on business plans.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves. Unrecognised deferred tax assets are reassessed at each reporting date and recognised to the extent that it has become probable that future taxable profits will be available against which they can be utilised.

Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted at the reporting date. The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Group expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

(iv) Tax exposure

In determining the amount of current and deferred tax, the Group and Company takes into account the impact of uncertain tax positions and whether additional taxes and interest may be due. This assessment relies on estimates and assumptions and may involve a series of judgments about future events. New information may become available that causes the Group and Company to change its judgment regarding the adequacy of existing tax liabilities; such changes to tax liabilities will impact tax expense in the period that such a determination is made.

Minimum tax

The Group and Subsidiary is subject to the Income Tax Act (CITA). Total amount of tax payable under CITA is determined based on the higher of the subsidiary's Income Tax (based on taxable income (or loss) for the year); and Minimum tax (determined based on 0.5% (2021: 0.25%) of the qualifying Subsidiary's gross turnover less franked investment income). Taxes based on taxable profit for the period are treated as income tax in line with IAS 12; whereas Minimum tax which is based on a gross amount is outside the scope of IAS 12 and therefore, are not presented as part of income tax expense in the profit or loss. The new Nigeria Tax Act, 2025 repealed the payment of minimum tax by loss-making companies.

Statement of Cash flows

The statement of cash flows is prepared using the indirect method. Changes in statement of financial position items that have not resulted in cash flows such as translation differences, fair value changes and other non-cash items, are eliminated for the purpose of preparing the statement. Finance cost paid is also included in financing activities while finance income received is included in investing activities.

Related parties

Related parties include other group entities. Directors, their close family members and any employee who is able to exert a significant influence on the operating policies of the Group and Institute are also considered to be related parties. Key management personnel are also regarded as related parties.

Key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Group and Institute, directly or indirectly, including any director (whether executive or otherwise) of that Group and Institute.

Notes to the financial statements

For the year ended 31 December 2025

Finance income and finance costs

Finance income comprises interest income on funds invested and foreign exchange gains on foreign currency transactions. Finance costs comprise interest expense on borrowings and foreign exchange losses on foreign currency transactions. Interest income or expense is recognized using the effective interest method.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to:

- the gross carrying amount of the financial asset; or
- the amortised cost of the financial liability

Foreign currency gains and losses on financial assets and financial liabilities are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

Reserves

Reserves comprise the residual interest in The Group's assets after liabilities are deducted. They are classified as either undesignated or designated:

Undesignated net assets : Their use is not designated by The Group Management for specific purposes.

Designated net assets: Those that have been restricted by The Group as reserve for replacing property, plant and equipment, intangible assets and other activities or purposes.

4 Significant accounting judgments, estimates and assumptions

The preparation of The Group financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accounting disclosures, and the disclosure of contingent liabilities. The Group has identified the following areas where significant estimates and assumptions are required, and where if actual results were to differ, may materially affect the financial position or financial results reported in future periods. Further information on each of these and how they impact the various accounting policies are described in the relevant notes to the financial statements.

Judgements

No judgment has been applied by the management of The Group in the process of applying the accounting policies.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below. The Group based its assumptions and estimates on parameters available when the financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of The Group. Such changes are reflected in the assumptions when they occur.

Notes to the financial statements

For the year ended 31 December 2025

Impairment of financial assets

The Institute reviews the estimation for impairment of receivable at the end of each reporting period and reflects the changes on a prospective basis.

Useful life of Property, Plant and Equipment and Intangible Assets

The estimation of the useful lives of assets is based on management's judgement. Any material adjustment to the estimated useful lives of items of property, plant and equipment and intangible assets will have an impact on the carrying value of these items.

Defined benefit plan

Repatriation benefit

The cost of the defined benefit plan namely: the repatriation benefit is determined using the projected unit credit method (PUCM) to determine the present value of the obligation at the end of each reporting period. The PUCM involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate and contract renewal period. Due to the complexities involved in the valuation and its long-term nature, other long term employee obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each reporting date.

The parameter most subject to change is the discount rate. In determining the appropriate discount rate to use, management's assumptions and yields on United States of America (USA) Treasury bills were used.

The assumptions used in estimating the obligation are:

- flight ticket increment rate
- the number of family members
- contract period

Notes to the financial statements

For the year ended 31 December 2025

9 Cash and short term deposits

	CONSOLIDATED		IITA SEPARATE	
	2025 \$'000	2024 \$'000	2025 \$'000	2024 \$'000
Cash on hand	184	143	184	143
Cash at bank	21,314	26,839	21,195	26,705
*Short term investments	18,058	25,410	18,058	25,410
	39,556	52,392	39,437	52,258

*Short term investment is an investment in fixed deposit with tenor less than 3 months with Barclays Bank.

Cash at banks earns interest at floating rates based on daily bank deposit rates.

10 Accounts receivable

	CONSOLIDATED		IITA SEPARATE	
	\$'000	\$'000	\$'000	\$'000
Donors (10.1)	30,240	23,710	30,240	23,710
Employees (10.2)	854	812	854	812
CGIAR Centers	3,150	3,966	3,150	3,966
Receivables from subsidiary	-	-	117	134
Other receivables (10.3)	2,068	1,265	2,068	1,265
	36,311	29,753	36,428	29,887

Receivables from subsidiary comprises transactions carried out on behalf of IITA BIP and its subsidiaries and charges for goods and services consumed during the year.

10.1 Accounts receivable – Donors

	CONSOLIDATED		IITA SEPARATE	
	\$'000	\$'000	\$'000	\$'000
As at December 31, accounts receivable from donors consist of:				
Window 1 and Initiatives	5,897	6,082	5,897	6,082
Window 3	3,400	1,664	3,400	1,664
Bilateral	21,238	16,074	21,238	16,074
	30,535	23,820	30,535	23,820
Loss Allowance	(295)	(110)	(295)	(110)
	30,240	23,710	30,240	23,710

Account receivables from donors are non-interest bearing and are generally on terms stated in the contract.

As at 31 December, 2025, IITA carried out an impairment assessment on all outstanding receivables from donors using Expected Credit Loss (ECL) method and an amount of \$295k was found to be impaired and provided for as at 31 December, 2025(2024: \$110K)

Changes in loss allowances were recognised as impairment loss on Donor receivables in the statement of activities and other comprehensive income.

See Note 21 on credit risk financial assets, which states how management manages its credit risk from donors.

Notes to the financial statements*For the year ended 31 December 2025***10.2 Accounts receivables - Employees**

	CONSOLIDATED		IITA SEPARATE	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
As at December 31, accounts receivable from employees consist of:				
Staff loans	419	538	419	538
Staff salary advance	435	274	435	274
	854	812	854	812

10.3 Accounts receivable – Others

	CONSOLIDATED		IITA SEPARATE	
	\$'000	\$'000	\$'000	\$'000
As at December 31, accounts receivable: Others consist of:				
Receivables from stations	1403	776	1,403	776
*Other receivables	749	489	665	489
	2,152	1,265	2,068	1,265

*Other receivables includes deposit with hosted institute, receivables from CGIAR and IITA centers

11 Prepayments

	CONSOLIDATED		IITA SEPARATE	
	\$'000	\$'000	\$'000	\$'000
Prepaid expenses as at December 31 consist of:				
Prepayment for Supplies - Non-Inventory	509	1,865	509	1,865

Changes in the present value obligation reported in the statement of financial position is as follows:

	CONSOLIDATED		IITA SEPARATE	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Beginning activities	1,379	1,429	1,379	1,429
Interest cost	35	28	35	28
Current service cost	55	62	55	62
Benefit paid	(175)	(101)	(175)	(101)
Remeasurement gain/(loss)	98	(40)	98	(40)
	1,392	1,379	1,392	1,379

Present value of obligation at the end

The key economic assumptions (per annum) used in determining gratuity plan benefit obligations for the repatriation benefit plan are shown below:

	IITA SEPARATE	
	2025	2024
	\$'000	\$'000
Discount rate	2.55%	1.97%
Ticket fare growth rate	5	5

Repatriation benefit payable in the future was discounted using the interest rate on US treasury bills.

Factors considered in the discounting include; contract tenure of the employees and ticket prices.

A quantitative sensitivity analysis for significant assumption on the repatriation benefit as at 31 December, 2025 is as shown below:

	Discount rate	Discount rate
	1%	1%
	\$'000	\$'000
Impact on the defined benefit obligation	(14)	1
	Ticket fare	
	1%	1%
	\$'000	\$'000
Impact on the defined benefit obligation	(84)	(97)

Sensitivity analysis has been performed using automated actuarial methods currently in use.

Notes to the financial statements*For the year ended 31 December 2025***17.2 Employee benefit liability (cont'd)**

A quantitative sensitivity analysis for significant assumption on the repatriation benefit as at 31 December 2024 is as shown below:

	Discount rate	
	1%	1%
	\$'000	\$'000
Impact on the defined benefit obligation	(14)	64
	Ticket fare	
	1%	1%
	\$'000	\$'000
Impact on the defined benefit obligation	(83)	(33)

The sensitivity analyses above have been determined based on a method that extrapolates the impact on defined benefit obligation as a result of reasonable changes in key assumption occurring at the end of the reporting period. The sensitivity analyses is based on a change in a significant assumptions, keeping all other assumptions constant. The sensitivity analyses may not be representative of an actual change in the defined benefit obligation as it is unlikely that changes in assumptions would occur in isolation of one another.

The Institute is committed towards ensuring that all obligations arising from the post employment benefit in the foreseeable future are settled.

18 Deferred income from donors

	CONSOLIDATED		IITA SEPARATE	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
At 1 January	1,387	1,259	1,387	1,259
Deferred during the year	968	716	929	689
Released to the statement of activities	(703)	(561)	(703)	(561)
At 31 December	1,653	1,414	1,614	1,387
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Current	929	689	929	689
Non-current	724	725	684	698
Total	1,653	1,414	1,613	1,387

Deferred income is raised when assets from restricted sources is capitalised and will be amortised over the economic useful life of the related asset(s). Amount deferred during the year is equivalent to the value of fixed assets procured from restricted funds in the year. It will be amortised over the useful life of the assets.

19 Net Assets(Reserves)

Net assets are the residual interest in the Institute's assets remaining after liabilities are deducted. These are classified as follows:

(a) Undesignated net assets

That part of net assets not designated by Institute's management for specific purposes.

Notes to the financial statements*For the year ended 31 December 2025***19 Net Assets(Reserves) (cont'd)****(b) Designated net assets**

That part of net assets designated by the Institute's management for specific purposes.

- Designation for future acquisition/replacement of property, plant and equipment and intangible assets

- Designation of net investment in property and equipment

Portion of the unrestricted net assets designated to reflect net investment in property, plant and equipment and intangible assets.

The following is a summary of net assets for the year ended 31 December:

	CONSOLIDATED		IITA SEPARATE	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000

Notes to the financial statements

For the year ended 31 December 2025

20 Fair value measurement

Set out below is a comparison by class of the carrying amounts and fair values of IITA's financial instruments, other than those with carrying amounts that are reasonable approximations of fair values:

	Carrying Amount		Fair value	
	2025	2024	2025	2024
	\$'000	\$'000	\$'000	\$'000
Financial assets				
Cash and cash equivalents	39,437	52,258	39,437	52,258
Accounts receivable – Employees staff loans	419	538	419	538
Accounts receivable - Others	665	489	665	489
Financial liabilities				
Accounts payable – Employees	7,491	8,045	7,491	8,045
Accounts payable- Others	7,472	7,560	7,472	7,560

Management has assessed that cash and short-term deposits, accounts receivable (CGIAR Centers and others), accounts payable (CGIAR Centers and others) are short term financial instruments. The fair values of these instruments have been determined using a discounted cash flow (DCF) methodology, applying market-based discount rates that appropriately reflect the credit risk and expected timing of cash flows associated with each instrument. Fair value measurements for accounts receivables, accounts payables and other payables are classified within Level 3 of the fair value hierarchy, while the fair value measurement for cash and cash equivalents is classified within Level 1. Accordingly, the carrying amount of cash and cash equivalents is a reasonable approximation of their fair value.

The fair value of loans receivable from employees is included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The discounted cashflow methodology has been used to estimate its fair value and it is classified within Level 3 of the fair value hierarchy.

During the reporting period ended 31 December 2025 and 31 December 2024, there were no transfers between fair value measurement hierarchies.

Notes to the financial statements*For the year ended 31 December 2025***21 Related party disclosures**

The information below provides details on the related parties of the Institute

Name of related party	Relationships	Nature of transaction
IITA Business Incubation Platform Limited (IITA BIP)	Subsidiary	Makes payment on behalf of the entity for its purchases, salaries, travels and other expenses

Related party balances:

	2025	2024
	\$'000	\$'000
<i>Trade and other receivables</i>		
Opening balance	134	641
Expenses incurred	149	189
Receipts from BIP	(166)	(189)
Transfer of receivables to capital contribution	-	(507)
	117	134

Compensation of key management personnel

	2025	2024
	\$'000	\$'000
Short-term employee benefits	2,746	5,847
Repatriation benefits	91	55
Pension benefits	478	642
	3,315	6,544

The amounts disclosed in the table are the amounts recognised as an expense during the reporting period for key management personnel.

Transactions with key management personnel**Director's loan**

For all years presented, the loans given to the key management personnel have been disclosed below:

	2025	2024
	\$'000	\$'000
Loans to directors	0	6

Notes to the financial statements

For the year ended 31 December 2025

22 Financial risk management policies and objectives

IITA has a robust risk management and mitigation strategy in place and it is managed by a risk management committee that reports to senior management. Risk management in the Institute has been cascaded to all levels of project management through training programmes involving staff at all levels. IITA faces three main risks in relation to financial instruments namely: credit risk, market risk (foreign currency risk) and liquidity risk.

Credit Risk

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The Institute is exposed to credit risk from its operating activities (primarily for accounts receivable: donors) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments.

Account receivables: Donors and employees

IITA's main sources of funding is by way of grants from several local and international cooperating partners. IITA faces the risk of some of the funders failing or refusing to release funding that has already been committed to IITA. There are many reasons as to why funders may fail to meet their obligations some, of them being: them facing their own liquidity challenges, failure by IITA to meet its own contractual obligations, over expenditures, disagreements and misunderstanding. IITA also grants loans and advances to staff for various activities. There is a risk that staff may resign from IITA without settling their loans. IITA mitigates this risk through the following measures:

- Discouraging pre-financed projects;
- Adhering to agreements with funding agencies;
- Managing budgets well to reduce the incidents of over expenditures
- Regular reporting and feedback from sources of funding to reduce disagreements and misunderstanding.

The requirement for an impairment is analysed at each reporting date on an individual basis for donors. The calculation is based Expected Credit Loss (ECL) model. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets disclosed in Note 10. The Institute does not hold collateral as security. The Institute evaluates the concentration of risk with respect to donor receivables as low, as its donors are located in several jurisdictions and industries and operate in largely independent markets.

Financial instruments and cash deposits

Credit risk from balances with banks and financial institutions is managed by IITA's treasury department in accordance with its policy. Investments of funds are made only with approved counterparties and within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by IITA's management on an annual basis, and may be updated throughout the year subject to approval of the Management. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through a counterparty's potential failure to make payments.

Notes to the financial statements*For the year ended 31 December 2025***22 Financial risk management policies and objectives (cont'd)****Credit Risk (cont'd)**

The credit quality of financial assets is assessed by reference to external credit ratings information about counterparty default rates.

	39,444	52,258	50,636	69,127

Cash on hand has been excluded from this rating.

Ratings for the banks were obtained from the Fitch ratings

Credit rating keys:

A : A financial institution of good financial condition and strong capacity to meet its obligations as and when they fall due. Adverse changes in the environment (macro-economic, political and regulatory) will result in a medium increase in risk attributable to an exposure to this financial institution. However, financial condition and ability to meets its obligations as and when they fall due should remain largely unchanged.

AA : A financial institution of very good financial condition and a strong capacity to meet its obligations as and when they fall due. However, financial condition and ability to meet obligations as and when they fall due should remain strong.

B : A financial institution where financial condition is weak but obligations are still being met as and when they fall due as more than one weakness and may require external support ,which, may not be assured. Adverse changes in the environment (macro-economic, political and regulatory) will increase risk significantly.

BB : Financial condition is satisfactory and ability to meet obligations as and when they fall due exist. Adverse changes in the environment (macro-economic, political and regulatory) will increase risk significantly.

Notes to the financial statements

For the year ended 31 December 2025

22 Financial risk management policies and objectives (cont'd)

Credit Risk (cont'd)

BBB : A financial institution of satisfactory financial condition and adequate financial capacity to meet its obligations as and when they fall due. It may have one major weakness which, if addressed, should not impair its ability to meet obligations as and when they fall due. Adverse changes in the environment (macro-economic, political and regulatory) will result in a medium increase in risk attributable to an exposure to this financial institution.

A + (plus) or – (minus) may be added to a rating. A plus added to a rating indicates that the rating may be raised. A minus means that the rating may be lowered. When no plus or minus is added to the rating, this means that the rating is unlikely to change. A positive or negative added to a rating is therefore a reflection of the rating outlook.

Restricted default 'RD' ratings indicate an issuer that, in Fitch's opinion, has experienced an uncured payment default or distressed debt exchange on a bond, loan or other material financial obligation, but has not entered into bankruptcy filings, administration, receivership, liquidation, or other formal winding-up procedure, and has not otherwise ceased operating. The RD rating reflects that the country (in this case, Zambia) has not serviced the bulk of its outstanding external debt failing to make a Eurobond interest payment in October 2020. Subsequently, the government announced that it would stop servicing all of its external debt, excluding some priority project loans, and applied for debt relief under the G20 Common Framework (CF).

Unrated: These are banks that are not rated by Fitch

Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market prices comprise three types of risk: interest rate risk, currency risk and other price risk such as equity price risk and commodity price risk.

IITA is only exposed to foreign currency risk.

Foreign Currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. IITA operates in 13 field stations in Africa and Europe. The main operating and reporting currency is the US dollar (US\$). The bulk of its funding from international cooperating partners is received in US dollars (US\$). Most of the stations in Africa are operating in a high inflation environment with volatile exchange rates as a result of this, IITA is exposed to foreign currency risks.

To mitigate volatility in foreign exchange fluctuations, IITA keeps the bulk of its funds in US dollars (US\$) and only releases smaller amounts in tranches to meet operational needs. The Institute's exposure to foreign currency changes for all other currencies are not material.

Notes to the financial statements*For the year ended 31 December 2025***22 Financial risk management policies and objectives (cont'd)****Liquidity Risk**

This is the risk that the Institute will not have enough funds to meet its obligations to pay implementing partners and suppliers of goods and services. IITA hedges against this by managing tight budget processes and ensuring that only planned activities are carried out.

The table below summarises the maturity profile of the Institute's financial liabilities based on contractual undiscounted payments:

Year ended 31 December 2025	Less					Total
	On	than 3	3 to 12	3 to 12	1 to 5

23 Contingent liabilities

As at 31 December 2025, all Commitments and Contingencies which are relevant in assessing the Group's and Institute's state of affairs have been taken into consideration in the preparation of these financial statements. The Group and institute are involved in pending litigation and claims arising in the normal course of operations. Additional information in respect of the contingent liabilities has not been disclosed so as not to prejudice the position of the Group and Institute. Management are of the opinion that no material loss is expected to arise therefrom.

IITA Tanzania was established through a memorandum of understanding with the government of the United Republic of Tanzania signed on 6 August 1993. However, it has been brought to IITA's attention that while the memorandum of understanding grants IITA a tax-free status this needed to be published in the government gazette for it to take effect. As a result of this, the Tanzania Revenue Authority made an assessment in respect of personal income taxes related to Internationally Recruited Staff (IRS) operating from the IITA Tanzania hub. IITA management are still in discussion with the relevant Government department with a view to an amicable resolution. Determination of an estimate of the financial effect and timing of any outflow is not practicable, and management are of the opinion that no material loss is expected to arise therefrom.

Notes to the financial statements*For the year ended 31 December 2025***24 Events after the reporting period**

There are no other events after the reporting date that could have had a material effect on the consolidated and separate financial statements that have not been provided for or disclosed in these financial statements.

25 Staff Numbers

The number of employees in the Institute as at 31 December, 2025 was 260 for the Institute for Internationally Recruited Staff (173 main IRS, 72 Consultants and 15 Visiting Scientists) and 1,443 and 1,409 Nationally Recruited Staff (NRS) for the group and Institute respectively across all the stations.

26 Non-Controlling Interest
